**Number of Covid Positive Cases** – The number of active cases that count toward an outbreak at a site.

**Case Percentage of School Population** – Percentage of active cases out of the total number of staff and students in person at the site.

**Outbreak Definition** – Two or more laboratory-confirmed COVID-19 cases among students or staff with onsets within a 14-day period, who are epidemiologically linked, do not share a household, and were not identified as close contact of each other in another setting during standard case investigation or contact tracing. Outbreak notifications will be sent at anytime Maricopa County Department of Public Health (MCDPH) deems two or more Covid confirmed positive cases is identified at a site and deemed as such. These are identified in communication with MCDPH and can be delayed due to all the pertinent information being received and confirmed.

**Infectious Period** – According to the Center for Disease Control (CDC), for a symptomatic person, the infectious period begins 48 hours before the onset of symptoms or for an asymptomatic person, the infectious period begins on the date the Covid test was taken that resulted in a confirmed positive.
