Dashboard Updates and Corresponding Data Time Periods

The MCDPH school dashboard will be updated every Thursday for case rate and percent positivity by area. The table below provides historical and future dashboard updates with the corresponding data time period shown on the pop-up report. Effective March 4th, data will include the most recent complete MMWR week (Saturday-Sunday) ending 5 days earlier. For more detailed guidance and how to interpret this report, visit Maricopa.gov/SchoolDashboard.

Notes:

- If the area selected has a % positivity noted as "NA" in a gray box, this means there were <10 total tests done in that area during the specified week.
- The metrics for areas that cross county lines only include case, test, and population data for Maricopa County residents. These data are representative of the case rate and % positivity for the portion of the area that is in Maricopa County and are not representative of the case rate and % positivity for the entire geographic area.
- Geographic regions with smaller populations will have case rates that vary more widely due to the small population denominator.
